SOLAR PLANT SECURITY SPECIALISTS

PROTECTING SOLAR ASSETS FROM BUILD TO OPERATION

PROTECTING SOLAR ASSETS FROM BUILD TO OPERATION

At CTSG, we deliver cost-effective, turnkey solutions to secure your solar plants. With over 14 years' solar industry experience, our expert team protects high-value assets, reduces risks, and ensures smooth, compliant operations.

WHY CHOOSE CTSG?

- **Lower costs** – efficient installation reduces project overheads and running costs
- **Peace of mind** – AI-powered detection cuts false alarms and prevents downtime
- **Faster ROI** – lower insurance premiums and reduced downtime mean quicker returns
- **Trusted expertise** – proven track record with leading UK renewable operators

WHAT WE DO

We provide end-to-end solutions - from build phase through long-term operation - including:

- Groundworks
- Fencing
- CCTV design & installation
- Access control
- Ongoing support with operation, maintenance & monitoring

CASE STUDY

When Equans needed full perimeter protection for a solar project in Nottinghamshire, CTSG delivered a turnkey package including fencing, groundworks, electrical infrastructure and CCTV. With 132 cameras we secured 10km of fencing. Because we manage every element, our turnkey solution eliminates the need for multiple contractors, streamlines delivery, and cuts out duplicated costs — meaning significant savings for our clients.

"CTSG are friendly, knowledgeable, and always exceed our expectations. Their professional approach makes them a trusted partner."
