

SECURITY O&M FOR LONG-TERM ASSET PROTECTION

O&M

Our dedicated O&M department ensures your solar plant security is reliable, compliant, and fit for purpose. We combine proactive maintenance, fast response, and smart upgrades to maximise uptime and asset lifespan.

WHAT WE DO

- **Consult, advise, deliver** – ensuring value-led solutions
- **Proactive & corrective maintenance** – keep your system healthy and help prevent failures
- **Remote support & monitoring** – fast issue resolution and real-time system health dashboards
- **System upgrades** – tailored solutions incorporating the latest AI analytics, HD optical or thermal technology
- **Camera pole replacements** – robust, non-conductive GRP poles designed to last
- **Alarm monitoring & response** – 24/7 coverage via our NSI Gold accredited services
- **Fencing & gates** – durable, compliant replacements and repairs across the UK

BENEFITS

- Maximise system performance and asset lifespan
- Reduce downtime and avoid costly breakdowns
- Achieve compliance with insurers and industry standards
- Trusted solar industry specialist for renewable asset protection

BayWa r.e.

"CTSG are a valued provider of solar plant security services and are a professional and experienced supplier."
