

CTSG
SOLAR SAFE

**SECURE SMARTER.
OPERATE SIMPLER.**

ACCESS CONTROL

Purpose-built security for solar farms, renewable energy sites & other remote installations.

Solar Safe™ by CTSG is a fully integrated security ecosystem designed to give you complete control and visibility of access to your renewable energy assets — from anywhere.

KEY FEATURES

- **Smart Access Control** – grant or revoke access remotely via smart locks and secure key boxes
- **Real-Time Activity Logs** – see who accessed what, when, and how
- **Instant Alerts** – for unexpected access or gates left open
- **Arm & Disarm CCTV** – via app, smart padlocks, smart keypads, or automated schedules
- **Automated Site Rules** – e.g. disarm CCTV automatically when a lock is opened

WHY SOLAR SAFE™

- No more physical keys or outdated combination locks
- Faster, safer, smarter than traditional systems
- Reduce site visits, save time, and cut operational costs
- Scalable and designed specifically for the solar industry

HOW IT WORKS

1. Install smart devices (locks, keypads, CCTV)
2. Set up your schedules and rules in the app
3. Control and monitor your site remotely, 24/7
